Gold coloured
braided cable

Silver coloured
braided cable

Fine light gold or silver coloured silk braided cables power and suspend the buds from the ceiling.

Cables are attached to the buds using specially designed threaded brass hubs plated in gold or nickel (see opposite for further details).

Bloom cables are fixed into ceilings using either:

- Minimal white ceiling plates
- Discrete individual ceiling roses with a choice of integrated or remote drivers

Alternatively Haberdashery's design team can produce custom fixing solutions for more challenging spaces.
